ROOMBOOKING
by TVTools

From a touch tablet with two embedded colored LED, monitor your meeting rooms schedule quicker than ever.

⚙ THE PURPOSE

A touch tablet is placed in front of every meeting room displaying the schedule of availability of each day. A simple look is enough to know the current state of the room thanks to the two embedded colored **LED**.

❓ DID YOU KNOW ?

The **Roombooking** solution is compatible with automation devices allowing you to add presence sensor or any monitoring tools.

🔧 TVTOOLS ASSETS

- Unlimited customization of the user interface (possibility to add buttons, booking scripts, other way to confirm the booking, using of PIN CODE, badge etc…)

- Interoperability with Google Calendar, Exchange, Office 365, Outlook, Zimbra, Lotus.

- Report anomalies directly on the tablet screen (video projector failure, light issues etc).

- The tablet can also display digital signage or your satisfaction form).

- Implementation of a RFID type badge reader.
